

Safe Medication Disposal

The Warren County Sherriff's office offers year-round medication drop off at their site in Lake George.

"SHARPS" and Liquid Medications are not accepted at the Med. Return box. The program offered by the Sherriff's office expands the options currently available for households to dispose of discontinued, expired or unwanted medications in a manner that considers public health, as well as the environment.

The drop box is located in the lobby of the Sherriff's office, if dropping off medications after 4:00PM, you will need to be buzzed into the building. Prior to 4:00PM the doors are open to walk into the lobby.

On a case by case basis, if a patient is home bound, an option may be available for a Sherriff to come to a community members home to pick up their medications for disposal.

To dispose of Liquid medications, mix them with an unappealing substance, such as cat litter and place the mixture in a sealed bag or container. Throw the container or sealed bag in the garbage.

Sharps & Medication Collection Sites for Community Members

Sharps Disposal

There are many individuals with serious health conditions who manage their care at home and use syringes. For example, people with diabetes use syringes to inject their own insulin and use lancets every day to test their blood glucose. In addition, injection drug users use syringes and needles. Safe disposal of sharps is

critically important to optimize health, safety and protection of the environment. The best way to ensure that people are protected from potential injury or disease transmission of blood

borne diseases due to needle sticks is to follow established guidelines for the proper containment of "sharps" syringes, needles and lancets and other safer disposal practices.

Safe Disposal of Sharps

The first step of properly disposing of your Sharps is to use an appropriate Sharps container. Sharps containers may be obtained from online, a surgical supply house or pharmacy. In order to use any of the area drop offs located on the right you will need to place the Sharps (needles, syringes, and lancets) into said container.
