Clinic Services Enrollment Subtotal	18	313	331

Notes:

A person may receive residential and/or non-residential services and is counted once for each program type in which he or she has been enrolled. This results in a grand total for all programs that is larger than the total number of individuals served.

Source: enrollment data was extracted from the Tracking and Billing System (TABS).

Notes: (cont)

Community Habilitation (currently reported in the Family & Individual Services section) replaced At-home Residential Habilitation on 11/01/2010.

Consolidated Supports & Services represents the number of people currently receiving the service and those who are in process of getting the service.

People with Autism and People with DD and a Mental Health Diagnosis by Age Group						
Population	Age Group					Total
