WHEREAS, the Runway 1-19 Extension Project (“Project”) at the Warren County (Floyd Bennett Memorial) (“Airport”) is subject to the requirements of State Environmental Quality Review Act (SEQRA) pursuant to 6 NYCRR Part 617, and

WHEREAS, the Project is intended to provide adequate runway length to accommodate the family of critical design airplanes/aircraft currently operating at the Airport and those anticipated to continue to operate at the Airport in the next five (5) years while ensuring requisite runway safety areas. The proposed extension of Runway 1-19 from 5,000 feet to 6,000 feet is needed to provide the necessary length to operate the existing and anticipated jet aircraft without imposing weight restrictions or requiring an intermediate fuel stop when flying to medium or long haul destinations. The proposed project involves a 1,000 foot extension to Runway 1-19 to provide a total length of 6,000 feet, constructing a parallel taxiway extension; excavating/grading 66.7 acres of land to construct the runway/taxiway extension, remove 10.6 acres of terrain penetrations, relocated lighting and navigational aids, and construct a maintenance road; removing 23 acres of trees that are RESS obstructions (5 acres on airport property, 18 acres off airport property within limits of existing aviation easement) redesign and publication of new approach procedures to the Runway 1 end (½ mile visibility minimum) and Pen and Ink change to ALP drawing to incorporate approximately 97.5 acres of county-owned land to airport-owned land, and

WHEREAS, pursuant to Resolution No. 341 of 2016 the Warren County Board of Supervisors authorized the Chairman of the Board to execute Part 1 of the Full Environmental Assessment Form (“EAF”), and requested lead agency status for the Project, and

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
Project : _____
Date : _____

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Impact on Land

- The proposed action may involve construction on land where depth to water table is less than 3 feet.
- The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.
- The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.
- The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).

Impacts on Surface Water

- The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of water.
- The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.
- The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.
- The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.
- The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.
- The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.

Impact on Plants and Animals

- The proposed action may result in the removal of, or ground disturbance in, any portion of a designated significant natural community.
 Source: Town of Queensbury CEA 0.08 acre Marl fen community will be lost

Impact on Critical Environmental Area (CEA)

- The proposed action may result in a reduction in the quantity of the resource or characteristic which was the basis for designation of the CEA.
- The proposed action may result in a reduction in the quality of the resource or characteristic which was the basis for designation of the CEA.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

RESOLUTION NO. 121 OF 2017

Upon review of the information recorded on this EAF, as noted, plus this additional support information

No Additional Information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Warren County _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
