

AUGUST

EMPLOYEE OF THE MONTH

Brenda Ashline

Maintenance Mechanic

One of the things we take for granted as employees is the physical environment we work in. But having clean offices, good carpets and paint jobs, and nice windows to let in the sunlight can sometimes be just as important as having a good boss who motivates you. Our Buildings & Grounds crew does an excellent job and as County Administrator, I've gotten to know some of them after hours and they're hard workers, and they all deserve our thanks. As anybody who works here, or any member of the public who comes here knows, we have one of the most beautiful outdoor campuses of any county seat in New York State and Brenda Ashline, our August Employee of the Month has a lot to do with that.

As Superintendent of the Department of Public Works, Brenda has been with my department for 14 years, she started off as a cleaner for a year, moved on to the road crew as MEO-Light for approximately 3 years, and then moved to Buildings and Grounds as a Maintenance Mechanic and has been there ever since. Besides all the wonderful things you see on the outside of the County Center, there are other things you don't see. Brenda has taken over the roll as the lead painter for Buildings and Grounds and most of the painting that takes place within the County Center is done by Brenda. Brenda along with others in the crew come in during snowstorms, not just to clean up the County Center for all the staff and visitors, but Brenda and others, take care of cleaning off all the nurses' cars in the fleet. Brenda is truly an asset to Warren County and the Department of Public Works.
