

EMPLOYEE OF THE MONTH MAY

Jeff Inglee Fish Management Specialist

Jeff is being recognized for the extraordinary assistance he provided to the Adirondack Chapter of Trout Unlimited in carrying out their support of numerous area Trout in the Classroom programs this past fall. The program entails raising trout eggs in the classroom for eventual placement in area streams. Due to a catastrophic event at the New York State Hatchery that supplied the eggs, none were able to be made available, thus endangering the ability of those who had signed up to carry out their programs this academic year.

Jeff was resolute in attempting to find another source to timely fulfill the need for eggs. When all efforts appeared to be in vain he was successful in stripping eggs from older fish at the hatchery and providing the needed eggs for the program.

Jeff is being recognized for his “beyond the call of duty” efforts.
