

JANUARY

EMPLOYEE OF THE MONTH

PATRICIA BELDEN

Health Services – Assistant Director of Public Health

It is with pleasure that to announce Patricia Belden, Assistant Director of Public Health, as employee of the month. Pat has been with the agency since 1990 and has demonstrated passion, dedication, leadership, and professionalism throughout her time with us. During these unprecedented times, Pat has gone above and beyond each and every day to meet the needs of the residents of Warren County. She has worked tirelessly with state, regional and local stakeholders on Warren County's response. From early on in the COVID-19 pandemic, the mindset has been "we stay until the work is done," which meant working from early morning hours until well into the evening to ensure that we as a County are on top of all of the aspects of the COVID-19 response and we are grateful for the effort. Whether it was putting in place a local Contact Tracing Team, establishing COVID-19 testing, public education, and most recently Vaccine Administration, we are fortunate to have Pat among us leading the charge. Her knowledge, experience, and efforts have contributed to the success of Warren County's response to the pandemic. She has been and continues to be an inspiration for staff, leading them through each and every day.
